

THE TRUTH  
OF 9/11

**TOP SECRET**

Savannah, Yr9  
St. Clement's High School History Department

# OFFICIAL EVENT TIME LINE OF 9/11

- 8:45AM- Flight 11, a Boeing 767 from Boston centre, hit the North tower of the World Trade Centre.
- 9:03AM- Flight 175, a Boeing 767 from Logan international airport in Boston, hits the South tower of the World Trade Centre. Both building are burning.
- 9:17-30AM - FAA shut down all airports in America
- 9:21AM- All bridges and tunnels are shut in New York.
- 9:40AM- FAA stops every single plane flying over the US and demand they land somewhere else. This was the first time in American history
- 10:05AM- The South tower of the World Trade Centre collapses.
- 10:10AM- Part of the military base the pentagon collapses after being hit by flight 77.
- 10:10AM- Flight 93 passenger over powered the Hijackers and crashed into a field in Pennsylvania which was headed for Washington and most likely the White House

- 10:24AM- FAA sends all air born flights to Canada
- 10:28AM- The North tower of the World Trade Centre collapses.
- 1:04pm- President Bush talks about the attack and puts America on military alert and asks for prayers for wounded. Declares America at war with terrorism.
- 1:27PM- Mayor Anthony A. Williams of Washington, D.C. declares state of emergency.

# CONSPIRACY THEORY

There are many conspiracy theories about the 11<sup>th</sup> of September 2001. Some believe that President Bush had the planes flown into the towers of the World Trade Centre. I believe that President Bush had interactions with Al-Qaeda, the terrorist group that took responsibility of the attacks that day. I think that President Bush had the attacks arranged for the day that he wasn't in the city and couldn't be seen as part of the whole thing. I think that he had the attacks for the purpose of starting a war, because you need a reason to start a war and there was nothing at the time to fight about. The attacks had an impact on America and the whole world to 'realize' what was in the world and that they had to stop it. I think that he also had the attacks planned to show that he was the hero of America and would stop and destroy terrorism. This would encourage people to vote for him again if he did something that no one else had ever done and started war of terrorism. I think that Bush founded Al-Qaeda and gave them the resources that they would need for the 11<sup>th</sup> of September.

I think that Bush also had bombs planted in the building to insure that it fell down and that it fell straight and controlled without hitting the buildings around it. There is evidence in videos taken when the building fell that there was small explosions as it collapsed just before the smoke could cover it. The reason that President Bush didn't want to talk about the 11<sup>th</sup> of September is because he didn't know how much of an impact that it would make and the death toll of the whole day that was his fault and what he caused by having the towers hit and collapse. I think that he felt guilty and couldn't talk about it confidently and so tried to change the conversation into something he could talk about without doubt or hesitation. I believe that the Government warned the owner of the World Trade Centre that the building were going to be hit by terrorists so they got Billions in compensation for the terrorism insurance they took out on the World Trade Centre just weeks before the attack. I think that flight 77 didn't hit the pentagon and the Government had no proof that it had happened other than freeze frames from film footage that they had and only showed the shots where a missile that hit the building wasn't in them. The only explanation for the excessively fast hit that is shown on the freeze frames is that it wasn't a plane because it wouldn't have been able to hit the wall in a matter of half a second then vanish into thin air leaving body parts still on the scene and for whole bits of plane to vaporise in the heat. The heat that would have been generated

from the aeroplanes fuel would not have been hot enough to melt the titanium of the planes exterior and metal frame. The 'plane' also hit the only side of the pentagon that had terrorist attack proof walls, either this is a massive coincidence, or the Government planned this so not to make as much destruction to the building so it would be easier for the wall to be built up again. President Bush was also said to the driver of the car taking them to the school he was to be at, " calm down son, Al-Qaeda isn't here," for this to be said by the President is very strange, but even weirder is that Al-Qaeda at the time were not a well known terrorist group, and as Bush wasn't very intelligent, maybe this was him accidentally letting part of the conspiracy out. President Bush claims that he saw the first plane hit the North tower on the TV in the reception of the school he was at, but the only footage that caught the plane hitting the North tower was released 12 hours after it hit and Bush wouldn't have been able to see it happen. When Bush was at the school with the children, he couldn't keep focus on what they were doing and seemed very distracted. I conclude that this is because he was thinking about the attack and whether it had been done already or if it was still happening. When his assistant supposedly told him of the second plane hitting the tower, he did nothing and his reaction did not change.

**FACT FILES**

**TOP SECRET**

# FLIGHT 11

Flight 11 was a passenger aircraft Boeing 767 from Logan International Airport, in Boston, Massachusetts, to Los Angeles International Airport, in California. The plane carried 76 passengers, 11 crew members and 5 hijackers from the terrorist organization, Al-Qadea. The hijackers turned off the transponder and it took 4 minutes for air traffic control to realize the change in flight pattern. The aircraft was then flown into the North tower of the World Trade Centre at 8:45AM.

# FLIGHT 77

Flight 77 was a passenger Boeing 757 from Washington Dulles International Airport in Dulles, Virginia, to Los Angeles International Airport in California. On the plane were 53 passengers, 6 members of crew and 5 hijackers from the terrorist organization, Al-Qadea. The terrorists took over the control of the plane after 35 minutes of the flight and deliberately crashed it into the side of the military base Pentagon. It crashed into the only side that had terrorist attack proof walls and the plane was never found.

# FLIGHT 93

Flight 93 was a passenger aircraft Boeing 757 that was from Newark International Airport in New Jersey to San Francisco International Airport, California. It had 33 passengers, 7 crew members and 4 hijackers. The passengers attempted to take power back from the hijackers and succeeded, but then crashed into a field near the Diamond T. Mine in Somerset County, Pennsylvania. The plane was supposedly being redirected to Washington DC, and was sent to crash into the Whitehouse.

# FLIGHT 175

Flight 175 was a passenger Boeing 767 from Logan International Airport, in Boston, Massachusetts, to Los Angeles International Airport, in Los Angeles, California. On the plane were 51 passengers, 9 members of crew and 5 hijackers from the terrorist organization, Al-Qadea. Exactly 30 minutes into the flight, the hijackers forcibly overtook the plane and the lead hijacker who was a trained pilot flew the plane into the South tower of the World Trade Centre at 9:03AM.

# NORTH TOWER

The North Tower of the World Trade Centre was built on the 15<sup>th</sup> December 1970 and located on West Street, New York. It had 110 floors, 99 elevators and was 1729 feet tall. The terrorist group, Al-Qaeda on The 11th September 2001, attacked it and crashed flight 11, a Boeing 767 passenger plane into the top floors of the building. The offices were located here and a huge office fire started burning paper and other office items. The fire was seen as the thing that made the tower collapse. The site where the tower once stood now has monuments where it stood called ground zero.

# SOUTH TOWER

The South Tower of the World Trade Centre and building started 3 years after the North tower.

Located on West Street, New York. It had 110 floors, 99 elevators and was 1326 feet tall.

The terrorist group, Al-Qaeda on The 11th September 2001, attacked it and crashed flight 175, a Boeing 767 passenger plane into the building 18 minutes after the North tower was hit. The site where the towers once stood now has monuments where it was called ground zero. The estimated death toll was 2,996 people including the 2 planes and people who were around the building.
